

JAYASURYA

SOFTWARE ENGINEER

K K Nagar, Chennai • 6385467340 • jai34563@gmail.com • linkedin.com/jayasurya2021

PROFESSIONAL SUMMARY

Full-stack developer proficient in building component-driven web applications with React and Node.js. Demonstrated ability to design and consume RESTful APIs, apply object-oriented principles in JavaScript, and deliver algorithmic solutions that improve performance. Experienced in Git-based version control, collaborative development, and translating complex data requirements into scalable, user-focused solutions aligned with Capgemini's focus on innovation and problem solving.

TECHNICAL SKILLS

JavaScript (ES6+) Object-oriented design React Node.js Express.js RESTful API development
MongoDB Git version control Algorithmic problem solving HTML5 CSS3 Tailwind CSS Three.js
Vite JWT Authentication Lazy Loading Code Splitting Asset Compression

PROJECTS

ResolveNow

Built with: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT

- Recognized a need for real-time community complaint tracking and defined the project scope, then engineered a responsive React front-end using functional components and hooks to manage state. Developed secure RESTful APIs with Node.js/Express, applying object-oriented patterns to structure route handlers and services. Integrated JWT authentication to protect endpoints, and coordinated API communication to ensure data consistency, resulting in a platform that cut complaint response time by 30%. Managed source code with Git, establishing branching strategies that enabled seamless collaboration and continuous delivery.

WearCraft 3D

Built with: React.js, Three.js, Vite, Tailwind CSS

- Identified market demand for interactive product customization and scoped a 3D web application, then built reusable React components that encapsulated state-driven color selection and rotation logic using object-oriented principles. Leveraged Three.js for real-time rendering and applied lazy loading, code splitting, and asset compression to meet performance targets across devices. Conducted algorithmic optimization of rendering loops, which boosted engagement metrics by 25%. Utilized Git for version tracking and implemented pull-request workflows to maintain code quality.

Career Path

Built with: React.js, JavaScript, Tailwind CSS

- Observed a gap in accessible career-planning tools and outlined functional requirements, then created an interactive web app with modular React components and Tailwind CSS for responsive layouts. Designed RESTful endpoints to serve role data, applying object-oriented design to separate data access from business logic. Optimized data fetching algorithms to reduce latency, leading to a 40% increase in user session duration. Employed Git for source control, establishing commit conventions that facilitated team reviews.

EDUCATION

Bachelor of Business Administration (BBA) S.S Government Arts College, Tiruttani

2020 – 2023
